## Product Overview

App will act as a virtual classroom connecting all the class teachers and students always.

Manage teaching staff and students like never before.

**Design** - Application is designed to be so simple taking into consideration that the users will be kids and people with very little interaction with or understanding of complex mobile apps.

**Simplicity** - We have taken into consideration that many student's parents are from farmers background or from small businesses and many have a hard time knowing the app and navigating through it. As shown in the picture application is playful and very easy to navigate and use.

**Easy Login** - We realized that login is hard for kids and parents. Managing email addresses and passwords is tedious, So the app has login based on the phone number and OTP verification which will work effortlessly. (ID-password is still preferred)

**Security** - We took app security seriously, that's why no one can even enter the application if they are not part of the School. And Admin or teacher can deactivate anyone with a button click within seconds.

# App features

## Notice board

For easy and well managed class communication in a professional way.

## Online Video Meetings

No more creating a link and sharing the code. Join the private meeting rooms in one button click.

## Homework / Assignments

Well organised homework for each class with interactive content.

## Recorded Class videos

Publish already recorded lectures of teachers on the app. And students can view them anytime.

## Digital ID card for students

Integrate the ordinary ID cards of the students with the app to see all information about the Students. Manages their documents and knows the academic progress by scanning the barcode.

## Weekly tests for student

Offer weekly MCQ based tests for better assessment of the students for every subject.

## Online Attendance

Record online attendance of the students. Parents will get notified for absence of the students. Including Home word checking.

## Online MCQ based exams

Arrange the online MCQ based exam on scheduled time.

## Offline app

Most of the application is fully functional without the internet. It saves all the important data (messages, homeworks, etc) offline for later use.

## Students

See all the members in a class or invite more to join. Edit their personal information on the app. You can deactivate the Student with a simple button tap and activate within seconds.

### **Bustracking**

Track the school busses from home to school. Parents will get notified about the whereabouts of the bus.

### **Arrange parents meeting online**

Arrange the class parents meeting online.

### **MCQ exams printed marksheets**

You will get printed marksheets of the students exams free. Upto 10,000 prints per year.

### **Get all the raw data of the application usage.**

All the graphs of the application usage will be submitted monthly. Including Attendance, Homeworks, Video meetings, etc.

### **Subjective written exams**

Application supports taking written exams online. And also have a facility to check exams in the application itself. Submissions will be private to the student and the teacher and won't be visible to other students.

### **Students monthly progress graphs**

Generate monthly progress of students in graphs and pie charts to better understand the performance of the student and identify the strengths and weaknesses beforehand.

### **Admin access and app security**

Admin or Principal controls everything including who can access the app and who cannot. Without invitation from the school no one can enter into application.

### **School Analytics of data (website dashboard)**

See the upward and downward trends of the Homeworks submissions, Noticeboards, Video meetings, Exams, etc.

### **Online classes and control room setup**

We will help you set up a classroom for virtual classes. Including a control room to look over all the classes realtime.
